MEDICATION ASSISTED TREATMENT PROGRAM

The Broome County Sheriff's Correctional Facility offers medication assisted treatment for Opioid Use Disorder.

First, any person who enters the facility who has been prescribed Buprenorphine (Suboxone) or Methadone for an opioid use disorder can continue that medication while

they are incarcerated. The facility will confirm your medication dose and how often you take it by calling your provider and checking on that.

Second, any person who enters the facility who has an Opioid Use Disorder and is not currently on a medication for treating that condition will be offered an option for medication to help with their withdrawal. The medication used in the facility is called Buprenorphine which is also known as Suboxone. The medication will be provided in the medical unit under the supervision of the nursing staff.

Third, for any person who is sentenced to the facility who has an Opioid Use Disorder and wants to have medication to help with treatment of that disorder, the facility provides Buprenorphine maintenance. This medication is taken once each day. In order to qualify for this program an inmate also needs to agree to participate in regular counseling activities.

NOTE:

Upon presenting to intake at the facility, each inmate will be screened for the presence of an Opioid Use Disorder. If the inmate has an opioid use disorder, then the components of this program will be offered. Overdose prevention and medication tapers will be offered to all persons with an identified opioid use disorder. The maintenance program will only be offered to individuals who are sentenced to serve time in Broome County. An inmate can be removed from any aspect of the program if they divert their medication or if they violate the terms and conditions of treatment while incarcerated. The steps in how the program works are listed below:

OPIOID OVERDOSE PREVENTION: For every person booked into the facility who is found to have an opioid use disorder, education on the use of an overdose prevention kit will be offered and prior to release each inmate who agrees to accept it, either a Narcan kit or special card to be presented at a pharmacy to obtain kit will be given.

MEDICATION ASSISTED TREATMENT:

Medication assisted treatment is broken into three parts which are listed below:

- 1. Continuing of medication from community:** If a person is booked into the facility and has been taking Buprenorphine (Suboxone) or Methadone in the community, that medication will be continued while the person is incarcerated.
- 2. MEDICATION TAPER:** For individuals booked into the facility who have an opioid use disorder who are not on Methadone or Buprenorphine (Suboxone) prior to incarceration, a medication taper will be offered to prevent the person from experiencing significant opioid withdrawal. If a person is released before that medication taper is completed, then a door to door treatment option will be offered to the person.
- 3. MAINTENANCE ON MEDICATION:** If a person is sentenced to serve time in the Broome County Sheriff's Correctional Facility and has an opioid use disorder, then the person will be seen by the addictions counseling team and they will be offered to participate in ongoing maintenance with Buprenorphine (Suboxone) for the duration of

their stay in the jail. This program has very specific requirements and each person must review each of these requirements and agree to them prior to starting their maintenance medication. It is also important that each person understand that if they violate treatment rules they may be tapered off their medication and if they divert their medication to another person they may face further legal charges in addition to being tapered off their medication.

Our goal with each component of this program is to reduce the risk of overdose, to continue ongoing treatment, to prevent unnecessary suffering from withdrawal, to improve treatment engagement when a person is released from the facility and to prevent re-arrest for drug related crimes. We recognize the power of addiction and have developed this program to try to help lessen the impact of the disease on each person who suffers with it.
